

Artem Diakunchak

Product Designer

✉ artem.diakunchak.work@gmail.com 📍 Belgium 🔗 behance.net/artemdiakunchak

Summary

Product designer with a hybrid design and development background, specialising in design systems, UX/UI, and product thinking. Experienced shipping real products across mobile, web, and brand - from early wireframes to final handoff. Proficient in Figma and Adobe CC with hands-on front-end development skills in React, Vite, and Astro.

Experience

Product Designer , <i>Mayten Technologies</i>	01/2026 – Present Remote, Belgium
• Was responsible for UX/UI redesign of the Cogo parking app's legacy interface, shipping a modernised experience to users across 60+ regions in Belgium • Designed new app features from brief and user stories to final visuals, including Apple Live Activities which led to increase in user base by 19%. • Redesigned Cogo website homepage, refining information architecture and visual language • Designed conference backdrop for Mayten's presence at MME Micromobility Europe in Berlin (the world's largest micromobility conference) which helped secure new partnerships. • Served as sole visual designer for all brand communications - producing social media posts, flyers, and print materials across feature launches, product announcements, and regional expansion into Germany and Netherlands. • Collaborated directly with CEO, product owner, and development team to align design decisions with business goals and technical constraints	
UX/UI Designer , <i>MarketEcho</i>	02/2025 – 12/2025 Remote
• Brought design from initial wireframes and content strategy through to shipped product. • Architected a comprehensive design system (50+ components, 300+ variants, color system, typography, spacing guidelines). • Designed core UI/UX for application, web, a statistical dashboard, and a back-office admin panel. • Achieved significant launch success: 100 active users on day one, excellent UX/UI reviews from testers, and secured first affiliate partners. • Collaborated closely with stakeholders and development, ensuring design alignment with business goals.	
WEB Designer , <i>Carnivale</i>	05/2024 – 01/2025 Antwerp, Belgium
• Directed the UX/UI redesign of a legacy website, transforming its information architecture and user interface into a modern, functional platform. • Proactively identified and addressed critical user pain points and inefficient conversion paths. • Conducted in-depth competitor market analysis to inform strategic design decisions for the website, CMS, e-commerce pages, and blog. • Delivered a modernised platform that improved conversion paths and CMS usability • Ensured seamless implementation by collaborating closely with front-end and back-end development teams, guaranteeing technical feasibility of designs.	

Education

Bachelor in Digital Design and Development (DEVINE), <i>Howest University of Applied Sciences</i>	2027 Kortrijk, Belgium
Bachelor in Applied Computer Science (Unfinished), <i>Karel de Grote Hogeschool</i> • Minor in AI, Data Science • Completed 2 out of 3 years of studies.	2024 Antwerpen, Belgium
